LeetCode

Codeforces

Education

Indian Institute of Information Technology, Surat

2023 - 2027

B.Tech in Electronics and Communication Engineering

CGPA: 8.01

Kendriya Vidyalaya ITBP Karera, Madhya Pradesh

2019 - 2022

CBSE – Class XII (Senior Secondary) and Class X (Secondary)

XII: 89.4% | X: 94.6%

Experience

XelronAI

March 2026 – Present

AI Data Training Specialist

Remote

- Contributed to large-scale AI data training and annotation pipelines used for fine-tuning Large Language Models (LLMs), enhancing model accuracy and reasoning capabilities.
- Performed structured prompt-response labeling, factual verification, and rubric-based quality evaluations across multi-domain datasets.
- Collaborated with ML engineers and reviewers to refine evaluation guidelines, improving consistency, reliability, and overall training data quality.

Projects

Smart Hiring and Resume Score Platform | Python, FastAPI, React.js, NLP, Scikit-learn

[GitHub](#)

- Architected an AI-powered recruitment platform with separate candidate and recruiter workflows, supporting resume upload, job matching, application tracking, and automated screening.
- Developed an NLP-based resume scoring engine using semantic similarity, skill extraction, missing-skill detection, and candidate ranking against job descriptions.
- Built recruiter dashboards with candidate search, GitHub profile analysis, fraud-signal detection, and interview-readiness evaluation, reducing manual screening effort by an estimated 60%.

Voronoi WSN Scheduler | Python, Flask, React.js, Docker, Machine Learning

[Live Demo](#) | [GitHub](#)

- Built a full-stack Wireless Sensor Network simulator implementing Voronoi-based node scheduling with backup-node logic, improving network energy efficiency and operational lifetime.
- Implemented fault-tolerance and recovery simulation modules with interactive dashboards for comparative performance analysis under cascading node failures, and containerized the platform using Docker for one-command reproducible deployment.

HomelabVault – SecureManager | Flask, SQLite, SMTP, Raspberry Pi, Linux

[GitHub](#)

- Engineered a self-hosted password manager using Flask, SQLite, and HTML/CSS, enabling encrypted storage of credentials, secure IDs, and private notes for personal cybersecurity use cases.
- Implemented Multi-Factor Authentication (MFA) via email-based OTP using SMTP and Gmail App Passwords, strengthening login security against credential-based attacks.
- Designed a responsive vault dashboard with secure backup/export and IST-timestamped audit logs, and deployed the app on a Raspberry Pi (Linux) for self-hosted local-network access, demonstrating real-world DevOps skills.

Technical Skills

Languages: Python, C++, C, JavaScript, SQL

Technologies/Frameworks: React.js, Node.js, FastAPI, Flask, REST APIs, HTML5, CSS3, Scikit-learn, TensorFlow, OpenCV, Pandas, NumPy, Matplotlib, OpenAI API, Git, GitHub, Docker, AWS, Linux, Raspberry Pi, Postman

Databases: PostgreSQL, MySQL, SQLite, Firebase

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Object-Oriented Programming, Machine Learning, Deep Learning, Natural Language Processing

Soft Skills: Team Leadership, Communication, Time Management, Adaptability, Event Coordination

Achievements

- Achieved a peak rating of **1870 on LeetCode** with **750+ problems solved**, and **1358 on Codeforces**, demonstrating strong problem-solving and algorithmic skills.
- Designed and self-hosted a live online quiz platform supporting **140+ concurrent students** with zero downtime and real-time interaction.
